Experience

Guy Harwood is currently working with a client and is unavailable for new work.

Guy has been working as a technical architect and software engineer delivering multiple UK Government cloud based services and solutions designed to meet Government Digital Services Guidelines.

Guy is skilled solution architect and enjoys working with technical leaders and teams to improve the flow of work through their system using agile techniques to improve coding practices and build out dev ops and cicd frameworks.

Guy has past experience creating internal cloud services using active directory, Xen and VmWare.
